<u>DATE/TIME</u>	<u>DESCRIPTION</u>
TUE, 08/11/26 @ 9:45pm	Updated THE TEXAN . Added Season 2.
TUE, 08/11/26 @ 7:00pm	Found a whole new, DEPENDABLE , source for video's. Have uploaded a new set of TWELVE OCLOCK HIGH series video's. Should work great now. (NOT ON ARCHIVE.ORG).
TUE, 08/11/26 @ 4:08pm	Been been looking at TWELVE O'CLOCK HIGH episodes, and since I download these from TORRENTS, it seems that whoever made the torrent, is putting a previous episode, and calling it the wrong episode, so it would look like you are downloading a complete season. Example, S01E30 - P.O.W Part 1. This video is the correct video, but episodes, S01E31 and S01E32 is actually S01E30, instead of the correct video. This is the trouble with trusting video's you download from torrents. This is what happens when you are getting video's for FREE. You end up getting video's from MORONS.
THU, 08/06/26 @ 7:10pm	Added Star Trek The Original Series , to the Local Server section. The episode order might be off, but they are all there.
TUE, 08/04/26 @ 6:00pm	Added 32 episodes to Captain Scarlet in the Local Server section.
TUE, 08/04/26 @ 1:40pm	Added the following series to the Local Server: Star Trek Enterprise , Star Trek TNG . Working on adding Star Trek TOS ...
MON, 08/03/26 @ 3:15pm	Added the following series: The Lone Ranger , Land Of The Giants , The Twilight Zone , The Big Valley , V TV Series , Wagon Train , The Untouchables , The Time Tunnel , and The Virginian , to the Local Server section.
MON, 08/03/26 @ 1:10pm	Added THE THUNDERBIRDS and STINGRAY animated TV Series under archive.org section.
SUN, 08/02/26 @ 8:05pm	Added the following series: Bonanza , Eureka , Hogans Heroes , Lost In Space , Maverick , Quantum Leap , The Wild Wild West , and The Rifleman , which are on my Ubuntu Server.
SUN, 08/02/26 @ 1:57pm	Updated THE RAT PATROL . Most of these video's are stored on archive.org, but since I got the external drive working, I linked the missing video's, on archive.org, to my external drive.
SUN, 08/02/26 @ 11:00am	Was able to FIX one of the EXTERNAL DRIVES that

is connected to the UBUNTU server, that contains all 2TB of video's, and is now available for viewing.
I have placed a link to these directories at the bottom of the **Local Server** section.

MON, 07/27/26 @ 10:25am

Am finding that **archive.org** is not a good place to play video's from, because of the

500 Internal Server Error - NGINX

which means that the server is down at that time. Am working on finding a better solution.

*** **THIS IS RIDICULOUS** ***.

SUN, 07/26/26 @ 3:35pm

Have uploaded more Tales Of Wells Fargo, but the episode list names are off, but still work. (workin on it). If you determine which episode names are off, go to the phpBB3 forum and make a comment.

SAT, 07/25/26 @ 3:00pm

All video's are stored on ARCHIVE.ORG, and sometimes this server gets overwhelmed by users, so until they add more cloud servers to this archive.org, it is better to keep trying the video, or try again later, when the server is not overwhelmed with users (bogged down). (Sorry, this is their **server farm** problem Not enough **bandwidth/Internet speed/servers**) on archive.org.

FRI, 07/24/26 @ 4:30pm

Am uploading all video's to be on archive.org, but it will depend on whether they accept them or not.

WED, 07/22/26 @ 9:40pm
